

Lambda Test Assessment

The "Before" and "After" FUEL MILES PER LITRE/GALLON were recorded by the vehicle owner.

Vehicle: SAAB 9-3 1958CC 4 Cylinders (Petrol)

Environment First

This vehicle had been pumping vaporised partially burnt and unburnt fuel into the environment for some considerable amount of time. These emissions are sometimes seen as black smoke but are often not visible, **wasting** significant amounts of **money** as you will see.

Over the previous 5,000 miles/8,000 kilometres, this vehicle consumed 1,057 litres/232.5 gallons of petrol.

This represents 20.3% of all fuel purchased.

It can be seen that **Lambda Add Me** pays for itself many times over.

Fuel prices for calculation purposes at £1.10 pence per litre and £5.00 per gallon.

Over the previous 5,000 miles/8,000 kilometres this vehicle has **wasted 214.5 litres/47.2 gallons of fuel at a cost of £236.00.**
